

SELCOM TEC 101

Programming Software for Windows 95 / 98 / ME / 2000 / XP

The screenshot shows the 'Unit at Sample CAT selected' window. It features a menu bar (File, Edit, Options, View, Utilities, Help) and a 'Finished' button. A text box prompts the user to contact their local dealer. Below this, there's a 'Select CAT / TEC Unit to Change' dropdown menu set to 'Sample CAT'. To the right, a 'Reader Type' section has radio buttons for 2 Rdrs, 4 Rdrs, 8 Rdrs, 12 Rdrs, and 16 Rdrs, with 16 Rdrs selected. A 'MUI Site' box indicates 'Unit is marked as MUI site'. At the bottom, there are icons for 'Add Unit', 'Directory', 'System CFG', 'Entrance CFG', 'Access Control', and 'View Log', along with 'Get from Unit' and 'Send to Unit' buttons. The Select Engineered Systems logo and address (Hialeah FL 33016) are also visible.

A CD-ROM with 'SELCOM' and '2002' printed on it.

The logo for Selcom TEC 101, consisting of a stylized 'S' and 'E'.

Selcom TEC 101 is provided on CD

Selcom TEC 101 is the latest release of programming software from Select Engineered Systems. This industry leading package is compatible with Windows 95, 98, ME, 2000 and XP. Selcom TEC 101 will program the TEC series products. The outstanding **NEW** features added to this 32 bit software program include:

- **Search** for any name or number in the directory. This search capability improves the user to finding the required information *fast*.
- **Full page reports** for the directory and configuration.
- **PIN** (personal identification numbers), used to enter via the keypad:
 - Can be loaded by increment.
 - Telephone numbers or extensions for a no phone bill system or PBX.
- **Manuals** for Selcom, and TEC 101 are available while running Selcom TEC 101.
