

SELCOM TEC Basic

Programming Software for Windows 95 / 98 / ME / 2000 / XP

Selcom TEC Basic is provided on CD

Selcom TEC Basic is the latest release of programming software from Select Engineered Systems. This industry leading package is compatible with Windows 95, 98, ME, 2000 and XP. Selcom TEC Basic will program the TEC series products. The outstanding **NEW** features added to this 32 bit software program include:

- **Search** for any name or number in the directory. This search capability improves the user to finding the required information *fast*.
- **Full page reports** for the directory and configuration.
- **Bulk loading:**
 - Cards, transmitters or wiegand numbers for keypads:
 - Can be loaded to an existing or new data base.
 - Can be loaded by column for TEC (data base is 1 card per entry).
 - Can be loaded by increment, i.e.; 6, 12, 18, 24, etc.
 - PIN (personal identification numbers), used to enter via the keypad:
 - Can be loaded by increment.
 - Telephone numbers or extensions for a no phone bill system or PBX.
- **Manuals** for Selcom, TEC Basic are available while running Selcom TEC Basic.
