

FREE Cellular Phone Application for User to Control any Select Gate Product

- Standard "Landline" SG Series Gate Control via app through Touch Tones (Requires GSM Phone*)
- Cellular SG Gate Control and basic programming via app (works with GSM and CDMA Phones*)

There are several ways to download the FREE SGMC Mobile App:

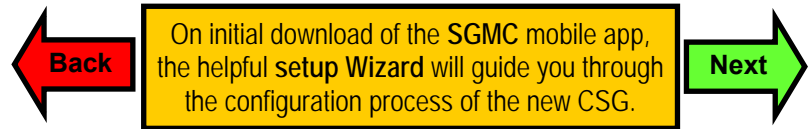

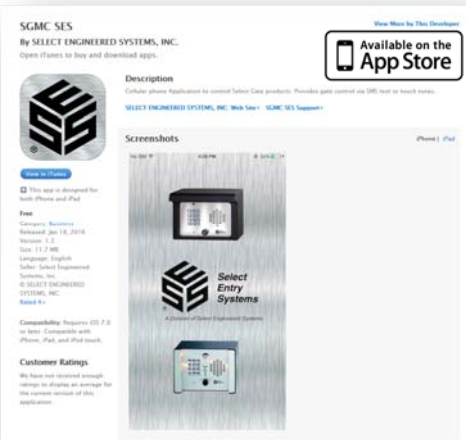

1. Scan QR code to be automatically redirected to the SGMC Mobile App download page on your Android or iPhone mobile device:

2. From an Android device, search "Select SGMC" in Google Play to go to the download page as shown:

3. From an iPhone, search "Select SGMC" in the App Store to go to the download page as shown:

Touching the "More" button will open up a screen where you can get Reports, Program the unit, Setup Notifications & Event Logs and other important system functions.

The Home screen will show the Select Gate units that are configured within the SGMC mobile app. Up to 4 CSG units can be configured.

The Command screen will allow you to Open / Close, Latch or hold entrance(s) Open 1 Hour. Check the Relay Status from this screen and touch the More button for additional functions.

*SGMC Mobile App can be used with any standard SG Series Product through Touch Tones on a GSM Compatible Device and with any Cellular SG Series products on a GSM or CDMA Compatible Device.
