

Typical Windows Run Time error codes when running applications.**Introduction**

Adverse interactions may occur from time to time on Windows systems for users running Selcom software. The usual reasons are incorrect Windows settings during installation or operation. These are some of the more common error listings under the categories of why they may have occurred.

1) User Account Control not fully turned up:

Run time error 339: (Windows component (.ocx, etc.) missing or not registered).

Run time error 429: (Active-X can't create component).

Run time error 523: (Data binding .dll could not be loaded).

Run time error 713: (Application-defined or object defined error).

REMEDY: Uninstall Selcom, turn UAC all the way up, and reinstall Selcom.

2) Insufficient Administrative or Read/Write file access privileges:

Run time error 75: (Path not found)

Run time error 438: (Object doesn't support this property when attempting to send data).

Run time error 3044: (Path not found).

Run time error 3050: (Couldn't lock file).

Run time error 32765: (When attempting to open log file).

REMEDY: See your IT administrator to provide proper access/privileges.

3) Corrupted Database issues:

Run time error 91: (Object variable not set).

Run time error 380: (VB Invalid Property Value)

Run time error 381: (Invalid property array index, or subscript out of range).

Run time error 454: (Object required).

Run time error 524: (Data type conversion error)

Run time error 3020: (Update or Cancel Update without Add/New or Edit)

Run time error 3021: (Record not found or bad EOF).

Run time error 3075: (Stack overflow; missing operator).

Run time error 3343: (Unrecognized data base format)

REMEDY: Create new site, get all data from panel.

4) Operating System issues:

Run time error 31: (Windows did not load required device driver).

REMEDY: See your IT administrator to resolve issue.

5) Operating System/ Application Interaction: (Need detailed steps to reproduce error.)

Run time error 5: (Invalid procedure call or argument)

Run time error 6: (Buffer overflow).

Run time error 94: (Invalid use of null)

Run time error 3012: (Stack Overflow).

Run time error 3191: (Cannot define field more than once)

Run time error 3426: (This action was cancelled by an associated object).

REMEDY: See your IT administrator to resolve issue.
